## SUMMARY

Aspiring software developer with 900+ hours of rigorous coding education at Hack Reactor. Experienced in full stack development using a variety of languages and frameworks. Highly organized and goal-oriented, with a passion for software development and a drive to learn new technologies.

---

## EXPERIENCE

### Delivery Driver Amazon

January 2023 - August 2023, New York , New York

- Loaded, organized, and secured equipment and orders in a company vehicle, using an electronic scanner to maintain an inventory of goods, and following a delivery schedule to ensure on-time delivery.
- Managed time effectively to make deliveries on time, maintaining high customer satisfaction with a 95% on-time rate, achieving over 500 deliveries with zero customer complaints.
- Showed a Customer-first approach by offering assistance with unloading and product setup, providing helpful explanations of products and service features, and managing customer relations seamlessly.

---

## PROJECTS

### Advice Generator

March 2023 -March 2023

- Using a 3rd party API, developed an Advice Generator, helping users get personalized recommendations based on their circumstances.
- Successfully deployed the Advice Generator, with over 25,000 users leveraging the service to get expert advice online, resulting in a 70% customer satisfaction rate.
- Reduced wait time by 30%, resulting in an improved user experience.

### Gamerconnect

January 2023 -March 2023

- Deployed the back end utilizing FastAPI and PostgreSQL for fast and efficient data handling, resulting in a 99.9% uptime and a 99th-percentile response time of 100ms.
- Improved user experience by creating an intuitive, user-friendly, and visually pleasing front end with React.
- Coordinated a workflow using git feature branches with a team of 4 to produce consistent and efficient code.

### Weather Tracker

December 2022 - January 2023

- Created a single-page application using React for a user-friendly interface, which presented accurate weather data to users.
- Built a Weather Tracker application using OpenWeatherMap API to allow users to view current and forecasted weather conditions at their current location and destination.
- Developed a responsive and accessible web application to track weather data across locations accurately resulting in a 10% reduction in average response time and a 40% increase in customer satisfaction.

---

## EDUCATION

### Computer Information Systems

Kingsborough Community College • Brooklyn, NY • 2021

---

## CERTIFICATIONS

### Advanced Software Engineering Certificate

Hack Reactor • 2023

A 19-week software engineering immersive program with 1000+ hours of coding. Full-Stack development with JavaScript, Python, Django, FastAPI, React, Redux, PostgreSQL, MongoDB, and MySQL in an AGILE environment.

---

## SKILLS

Front-End | HTML, CSS, Bootstrap, React, React Hooks

Back-End | Django, FastAPI, Node.js/Express, PostgreSQL, MongoDB, RabbitMQ

Programming | Python 3, Javascript, SQL

Tools | Git, Docker, DOM manipulation, Microservices, Domain-driven design
